AMENDMENT AND RESPONSE

Dear Sir:

In response to the Office Action dated September 8, 1999, the Applicant replies as follows:

IN THE CLAIMS:

Please cancel claims 2, 8, 13, 61, and 67 without prejudice.

Please amend the claims as follows:

1. (twice amended) A method for predicting a response of a patient to a selected treatment [of] for unipolar depression from at least one pre-treatment clinical symptom, comprising:
 - a.) performing at least one measurement of said pre-treatment clinical symptom on said patient and measuring said pre-treatment clinical symptom which is a predictive symptom selected from the group consisting of predictive symptoms so as to derive data for a baseline patient profile;
 - b.) defining a set of a plurality of predictor variables which define [a set of] said data [of] for said baseline patient profile, said set of predictor variables comprising said predictive symptoms and a set of treatment options;
 - c.) deriving a model that represents a relationship between [said] a response of a patient in a study and said set of predictor variables, said relationship derived through using at least one automated non-linear algorithm; and
